- » Ships completely assembled.
- » Equipped with casters and three adjustable, ventilated shelves.
- » Provides equipment security with lockable front and rear doors.
- » Access cables through rear split panel without tools!
- » NEMA 12 rated.

## OVERVIEW

Need to protect your equipment? Don't sweat it—get the [ClimateCab](#) from Black Box. The unique design of this computer/monitor cabinet ensures that your equipment stays cool and out of the wrong hands.

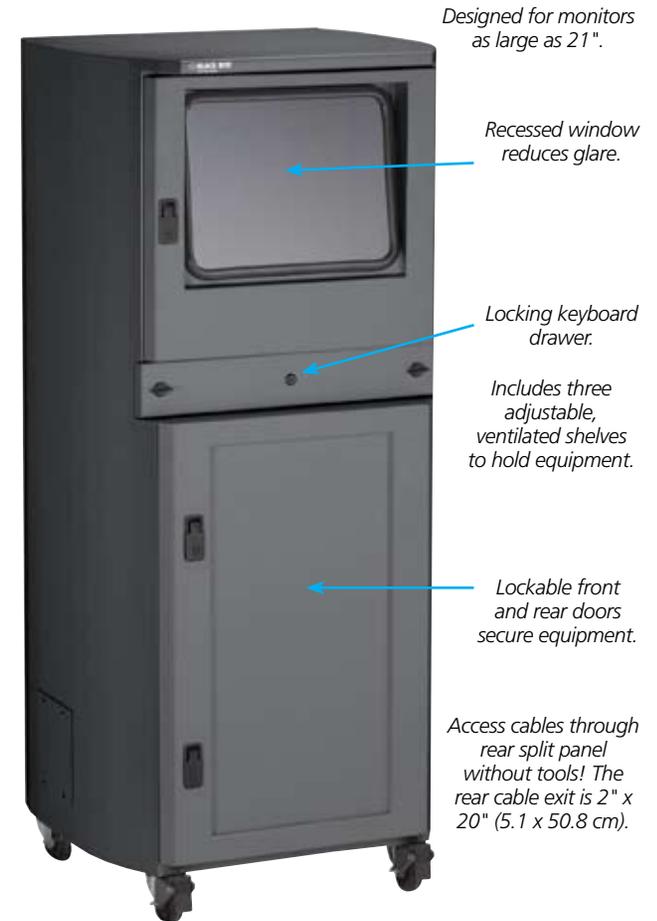

Equipped with a 2000-BTU air conditioner, the [ClimateCab](#) is perfect for harsh environments. Its internal evaporator eliminates condensation, and the closed loop system ensures that no outside air is drawn into the cabinet. Still worried about using your computer without letting the cold air out or the hot air in? Relax—the keyboard/mouse drawer is sealed independently. So even when the keyboard drawer is fully extended, your enclosed equipment is safe.

But thermal protection isn't the only security you need, which is why the [ClimateCab](#) also features lockable front and rear doors. These doors also make it easy to access your equipment. In addition, the rear split panel doesn't require tools, so you'll have convenient access to cables.

These security features don't preclude flexibility either. Although the cabinet is designed to accommodate a monitor as large as 21" (in addition to other computer equipment), the three adjustable, ventilated shelves make it easy to position your equipment.

You'll also have flexibility when organizing your work space. The [ClimateCab](#) has lockable, industrial-grade casters that provide ease of movement without compromising the stability of your cabinet. Or if you prefer, order the Bolt-Down Legs for increased security. For even more options, order the Rack Channel. The Rack Channel is 18U for 19" rackmount capabilities.

But just because the [ClimateCab](#) is secure, functional, and flexible, doesn't mean it can't look good, too. The cabinet's recessed window helps to reduce glare on the monitor, and the contoured sides ensure that the [ClimateCab's](#) appearance is just as attractive as its security features are.

Designed for monitors as large as 21".

Recessed window reduces glare.

Locking keyboard drawer.

Includes three adjustable, ventilated shelves to hold equipment.

Lockable front and rear doors secure equipment.

Access cables through rear split panel without tools! The rear cable exit is 2" x 20" (5.1 x 50.8 cm).

Lockable industrial-grade casters provide ease of movement. Or, order the Bolt-Down Legs for increased security.
