

SealTite™ Waterproof Connector Kit

For CATV and satellite
dish installations,
carry this kit.

FEATURES

- » Includes all the tools you need to prepare an RG-6 quad cable for "F" type weatherproof connector crimps.
- » Ergonomic Coaxial Cable Cutter offers precise coax cuts with ease.
- » SealTite Crimper crimps in one cycle.
- » Coaxial Cable Stripper features user-selectable preset strip lengths for RG-59, RG-6, and RG-6 Quad termination.
- » Tools and connectors are also sold separately.

OVERVIEW

This kit gives you the tools you need when working in applications that require weatherproof CATV "F" connections. It's the must-have kit for installers or technicians who service satellite dish installations in the field and need the tools of the trade within easy reach.

The kit's tools fit easily in a nylon zippered case, which measures 8"H x 4"W x 2"D (20.3 x 10.2 x 5 cm).

Order the complete kit or the individual components:

The Coaxial Cable Cutter (FT961) enables you to cut solid and stranded cables (up to 6 AWG) professionally and precisely without deforming the cable or straining your grip. The tool features hand-stops that prevent slips, as well as textured handles. You can sharpen its blades with a round file.

The Coaxial Cable Stripper (FT962) has the same ergonomic design and high performance as the cutter tool. It performs two-level stripping of coaxial cables, stripping the outer jacket, shield braid, and inner dielectric. Self-regulating tension holds the cable securely within

the tool's jaws during stripping. To set the cutting depth according to the thickness of the cable, simply change the blade setting with the included hex key. The stripper also offers user-selectable preset strip lengths for RG-59, RG-6, and RG-6 Quad termination.

For weatherproof CATV coax crimps, we offer the SealTite Crimper (FT963). This durable tool tightly fastens 75-ohm "F" type connectors for RG-59 and RG-6 Quad cables. In addition to the SealTite RG-6 Connectors (FT965), the tool crimps Augat/T&B Snap-N-Seal™, AIM CATV, and SealTite RG-59 waterproof connectors. Fully ratcheting, it crimps in one cycle.

To flare the coax cable's shield braid away from the center conductor before installing the connector, use the RG-59 and RG-6 Quad Flaring Tool (FT964).

What's included

FT960A:

- ◆ Coaxial Cable Cutter (FT961)
- ◆ Coaxial Cable Stripper (FT962)
- ◆ SealTite Crimper (FT963)
- ◆ RG-59 and RG-6 Quad Flaring Tool (FT964)
- ◆ (10) SealTite RG-6 Connectors (FT965)
- ◆ Nylon, zippered case

Why Buy From Black Box? Exceptional Value. Exceptional Tech Support. Period.

Recognize any of these situations?

- You wait more than 30 minutes to get through to a vendor's tech support.
- The so-called "tech" can't help you or gives you the wrong answer.
- You don't have a purchase order number and the tech refuses to help you.
- It's 9 p.m. and you need help, but your vendor's tech support line is closed.

According to a survey by *Data Communications* magazine, 90% of network managers surveyed say that getting the technical support they need is extremely important when choosing a vendor. But even though network managers pay anywhere from 10 to 20% of their overall purchase price for a basic service and support contract, the technical support and service they receive falls far short of their expectations—and certainly isn't worth what they paid.

At Black Box, we guarantee the best value and the best support. You can even consult our Technical Support Experts before you buy if you need help selecting just the right component for your application.

Don't waste time and money—call Black Box today.
